

GHOSTLY IMAGE CAUGHT WITH AUTOMATIC CAMERA

John and Debbie Hercsek of Bath Ohio have an automatic Stealth Cam set up in their front yard that goes off **when something moves in front of it**. They feed the wildlife in the area and so have captured some interesting photographs over the past few years. However, what they captured on the morning of May 27th was shocking. Debbie sent me the photos. Notice that there is only a second difference in each photograph. The date and time are shown on each print and are inscribed automatically by the camera. Also, keep in mind that the camera is fixed and does not move.

If this isn't an image of a spirit, I can't image what else it could be. The image was there for less than a second, as you can see from the photos before and after it was taken.
